Steven Rose, Commissioner of Human Services
Michael Rosen, Deputy Commissioner

Local Health Department Flu Vaccine Locator

H1N1 Flu Vaccine:

WHO SHOULD GET VACCINATED AGAINST H1N1 FLU?

H1N1 vaccination is now recommended for ALL New Yorkers over 6 months of age, not just those in the initial priority groups. This includes senior citizens age 65 and older.

AM I ELIGIBLE TO GET THE H1N1 FLU VACCINE?

Yes. New York State is now making the vaccine available to ALL New Yorkers. During the first phase of New York's statewide vaccination campaign, when supplies of vaccine were limited, the State designated the H1N1 vaccine for priority groups considered at highest risk of serious illness and complications from the flu and those at risk of transmitting the flu to vulnerable individuals. Now that there is an adequate supply of vaccine, the State has expanded access to the vaccine to ALL New Yorkers.

THE H1N1 VACCINE IS SAFE.

The H1N1 vaccine will NOT make you sick, but the flu WILL. Like the seasonal flu vaccine, the H1N1 vaccine has a very good safety record. Most people who receive the H1N1 flu don't experience any symptoms afterwards; some feel a temporary mild soreness in the arm. The nasal spray vaccine is also safe, effective, and easy to use.

WHERE CAN I GET THE VACCINE?

The vaccine is available from many health care providers, community health centers, and now pharmacies. [Find Flu Clinics Near You!](#)

Anyone still interested in receiving an H1N1 vaccine can come to Oswego County Health Department's immunization clinic at 70 Bunner St. Oswego, NY 13126 every Friday from 12:30pm-3:30pm. No appointment is needed for these clinics.

Seasonal Flu Vaccine:

Check with your regular health care provider to see if he/she will offer their patients the seasonal flu vaccine. There may also be other sources of seasonal flu vaccine available locally, such as pharmacies and other retail outlets. Oswego County Health Department will hold regular flu clinics in the fall when the flu vaccine arrives.
